Re: School Start Time, Schedule and Transportation Update
Date: June 10, 2019

Attached please find the full report from our transportation consultant, Public Management Associates. The initial findings of the report were presented at the school committee meeting on April 8, 2019 by Richard Labrie from PMA. Liam Hurley and I look forward to updating the committee on the implications of the final report and follow up work that has been done related to transportation, school start times, and high school schedule.

We hope you find our update informative and will be happy to answer any questions you may have.
